

KAUA Annual Technical Report

March 2018 through March 2019

1. Inspections 2018

Inspections for Gold Road Crest were held on May 9th 2018 for all of the lower site facilities and the transmitter buildings for the upper site. Inspectors were Tim Soares and Jack Trahan for the KAUA and Maria Troche representing the Kingman Field Office of the BLM. Upper site towers were inspected on a different date by Ken McLaughlin for the KAUA and Andy Whitefield for the BLM.

All of the site holders were substantially in compliance. Minor issues were a couple of missing site plans, and missing electrical panel fillers. Continuing issue of non compliant colors on non-grandfathered microwave dishes and ground mounted equipment (generators etc).

Inspections for Hayden and Getz sites were held on June 20th 2018 Inspectors were Tim Soares with Maria Troche and Ken McLaughlin with Andy Whitefield. The biggest issues were sites that could not be accessed and feed line terminations on unused antennas. Site holder representatives promised to correct the issues ASAP.

2. Interference.

No major interference issues were reported for this period.

Respectfully submitted by:

Tim Soares
