

KINGMAN AREA USERS ASSOCIATION

2020-2021 TECHNICAL COMMITTEE REPORT

Ken McLaughlin – on behalf of KAUA Road Committee Chairman
July 25, 2021

COMMITTEE MEMBERS ON RECORD:

Ken McLaughlin, Wecom – Chairman
Jack Trahan, Wecom – Member
Duane Dunn, - Member

This report spans from March 2019 to July 29, 2021. The Covid-19 interruption of KAUA business attributes to extended time between the last Technical Committee Report.

HAYDEN PEAK

No annual inspections. Additional transmitters have been observed in the SBA upper communications site shelter in which there have been no additional or new Technical Data Sheets that have been sent to BLM or KAUA. Also a new right of way has been granted for Mohave County Flood Control and Technical Sheets are expected to be submitted to BLM – KAUA prior to any applicable transmitters going into service. The next inspection will be scheduled sometime after the July 29, 2021 Annual Meeting. There is at least one occasional interference problem with the Mohave County District-1 repeater that is being investigated by Wecom which just began. If the problem persists and is not easily resolved the effort to locate the cause will be escalated.

GETZ PEAK (north & south)

Additional transmitters are believed to have been installed and will be confirmed on the next site inspections.

BLACK MESA

No inspections have taken place for more than a year; however, it is believed there have been no known changes.

POTATO PATCH (upper & lower)

No inspections have taken place for more than a year; however, it is believed there have been no known changes.

OATMAN-GOLDROAD CREST

No inspections have taken place for more than a year; however, it is believed there have been no known changes.

The next inspections will be compared to existing records in order to update the transmitter records under BLM/KAUA.

Ken McLaughlin-KAUA
President & Technical Committee Member.
